COMMUNICATIONS

August 2020

What's the latest news?

Foundation Data Model (FDM): Worktags have been determined for the first build of the UVA Workday Financials tenant. Users will be able to test and provide feedback during the upcoming configuration and prototype phase. [Read more about FDM.](#)

Internal Service Providers (ISPs): Schools and unit representatives and FST team members are connecting to gather information about ISP needs to ensure Workday will be set up well to handle ISP activity. [Get more ISP info.](#)

System Remediation: Work continues to identify necessary changes to ensure Workday will interact effectively with other UVA systems. FST team members will partner with schools and units to support implementation of remediations. [Find more details about system remediation here.](#)

Workday Word of the Month: **Driver Worktag**

As FST progress continues, it's important we all get familiar with Workday Financials terms. A driver worktag is one of four FDM worktags (Grant, Gift, Project, and Program) used to determine certain associated worktag values (e.g. Cost Center, Fund) within Workday. When users select a driver worktag, the other associated worktag values default accordingly, without users having to enter them.
