

Finance Strategic Transformation

COMMUNICATIONS

November 2020

What's the latest news?

Configuration and Prototype:
It's official: FST is now in the Config and Prototype (C&P) phase. Customer Confirmation Sessions (CCSs) will take place between Nov. and Dec. holidays. Participants, primarily those who participated in Architect sessions, will see how some UVA business processes work with our data. [Read more about the C&P phase and CCSs](#) in the UVAFinance blog.

System Remediation Network:
The network recently kicked off activities. Participants are those responsible for systems requiring remediation to integrate with Workday Financials successfully. The network has a dedicated area in the [online Community here](#) to share information, documentation, tools, and best practices for effective system remediation.

PaymentWorks and Spend:
FST is finalizing the decision to transition to [PaymentWorks](#) from Jaggaer Total Supplier Management (TSM). Other decisions: Jaggaer will be the initiation point for punchout and non-catalog requisitions in the future state, and UVA will stop working with shipping and freight partner VPL. More detail in the [Fiscal Admin materials here](#).

Workday Word of the Month: **HCM Remediation**

HCM stands for "Human Capital Management." The Ufirst project implemented Workday HCM, and FST will implement Workday Financials. Because we replaced our human resource system before our financial system, some configurations in Workday HCM had to be established to integrate with Oracle Financials. Now we will need to re-evaluate these configurations and integrations in order to take advantage of having a single Workday platform for human resources and finance.

See more [Workday Words here](#), and please email word suggestions to financetransformation@virginia.edu.
